

Multiple phaC copies per genome: how common, and driven by what

31,464 phaC-positive genomes (37.7% carry ≥ 2 copies). Panel D bars colored teal/orange by above/below the 37.7% overall rate; see figures/phac_multicopy_by_habitat.tsv for the phylum-controlled CMH test.

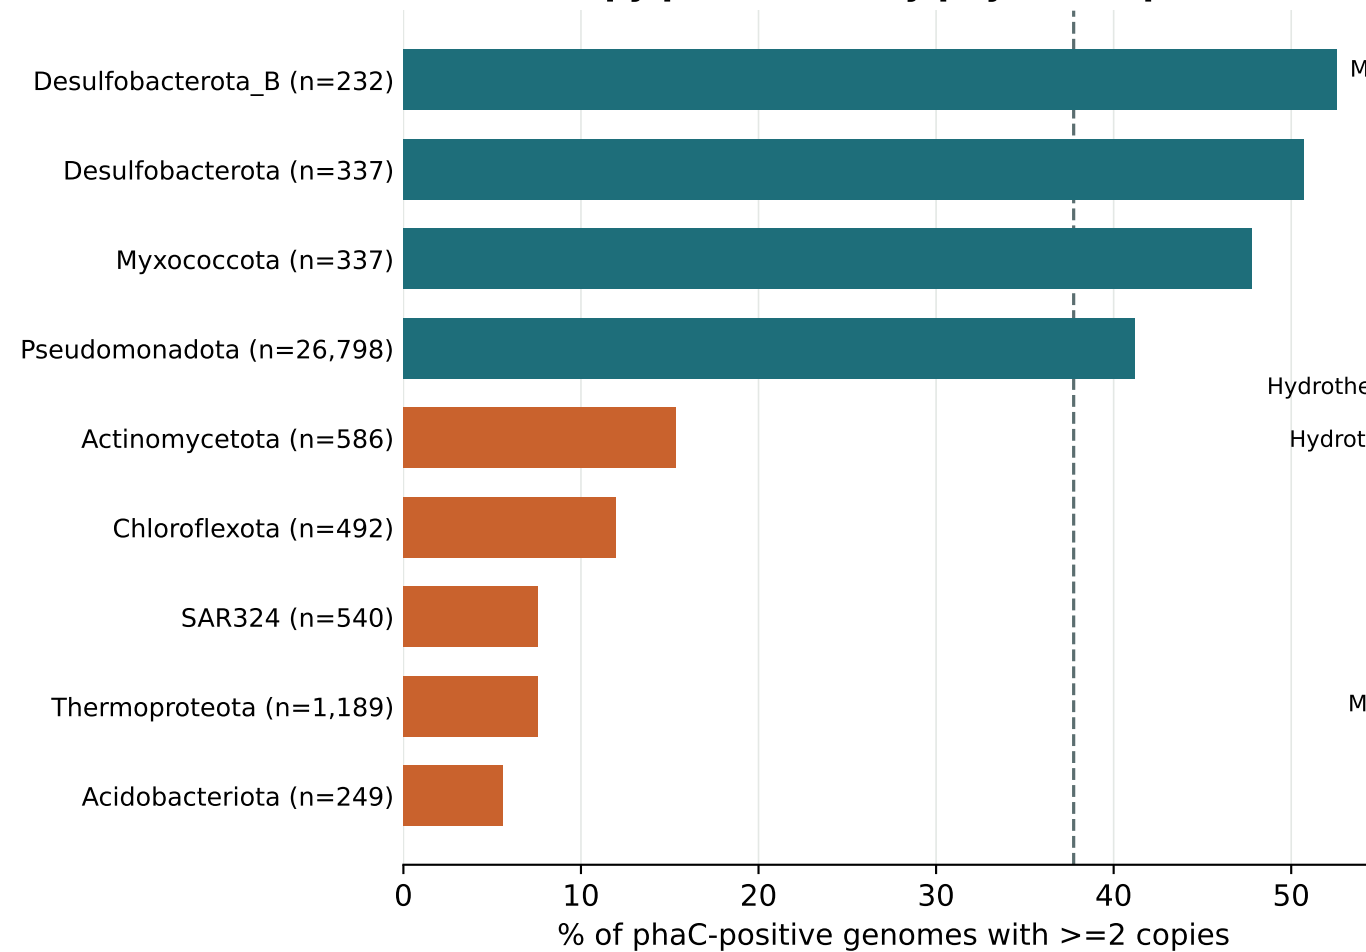

A. phaC copy-count distribution

B. Does copy count track with contamination?

C. Multi-copy prevalence by phylum (top 9)

D. Multi-copy prevalence by habitat
